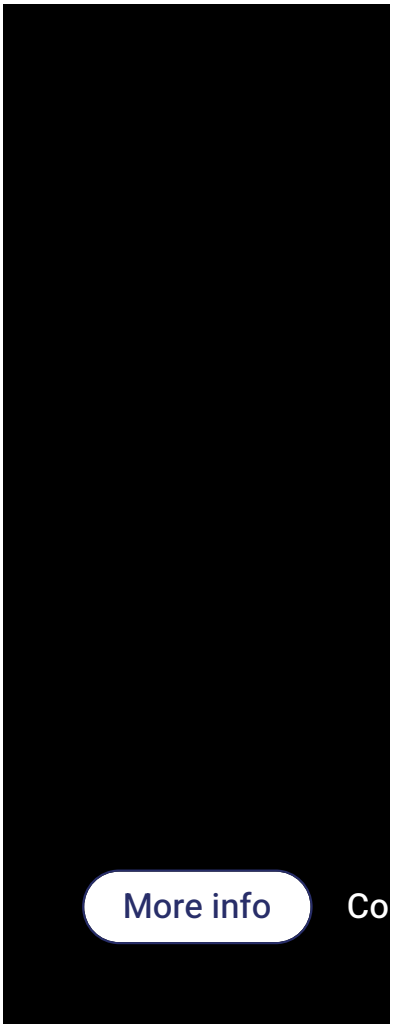
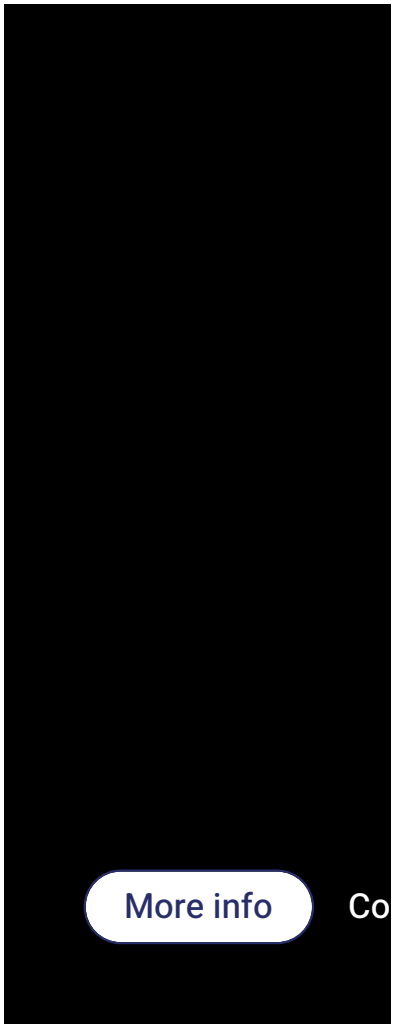
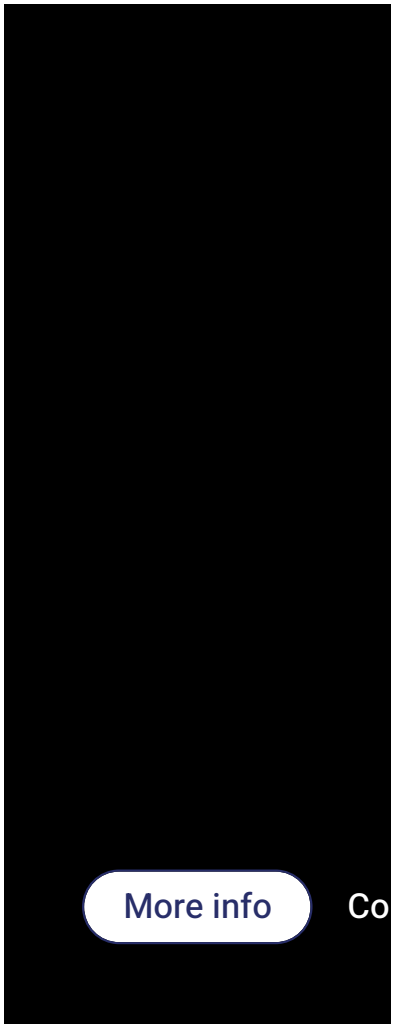
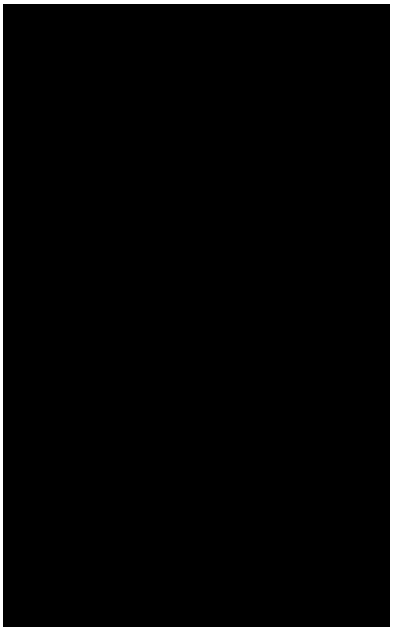
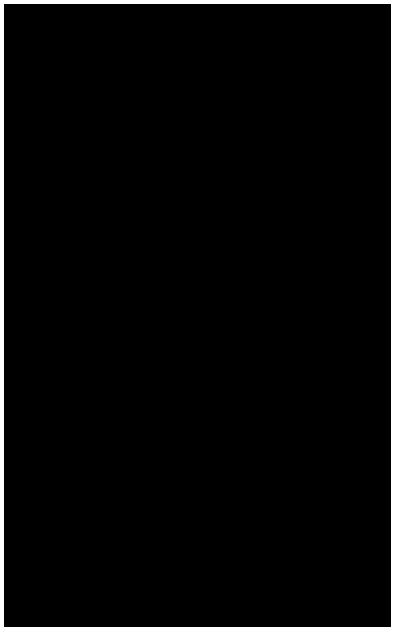
Our Experts

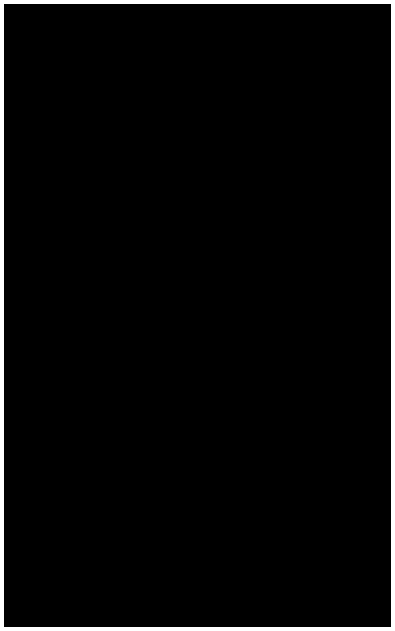


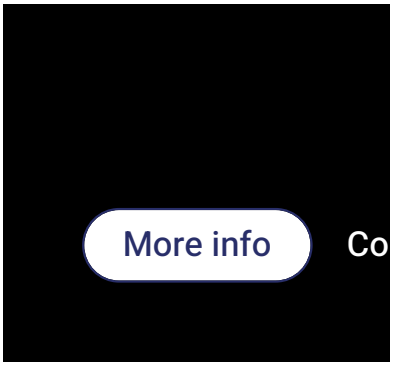


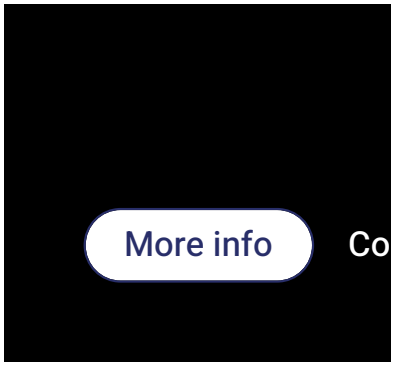


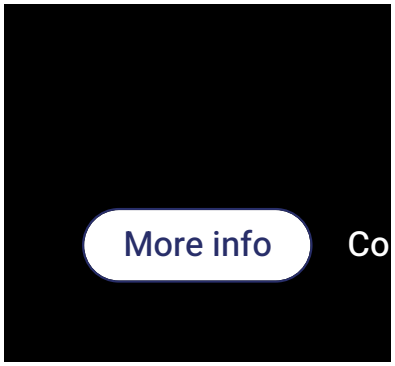












See directory (+150)

Areas of work

WICE delivers solutions in health and nutrition, environment and energy, economic development, policy and governance, and public-private sector partnerships for a sustainable future.

See all our work areas ↗

Sustainable Food Systems

Creating and implementing food production, distribution, and consumption practices that minimize environmental impact while supporting human health and social equity, WICE works across the food system to optimize resources to reduce waste, promote regenerative

Health and Nutrition

Strengthening healthcare systems, promoting sustainable healthcare practices, enhancing access to nutritious food, and supporting innovations that address malnutrition and disease prevention.

Environment and Energy Solutions

Designing solutions that integrate natural processes and ecosystem function to address environmental, social, and economic challenges, such as energy needs, disaster risk, and water security. WICE collaborates with the private sector, academics and community stakeholders to identify long-term, cost-effective

Projects

See our projects

WICE has projects in over 80 countries around the globe that aim to create lasting impacts by promoting sustainability and empowering local communities.
